

Created Playwright with Java code using vibe coding for AI Browser extension

PRompt given for ASK

Context : Act as a software automation test lead having experience in Playwright with Java and wants to modify the existing AI browser extension code to append Playwright with Java

Instruction :

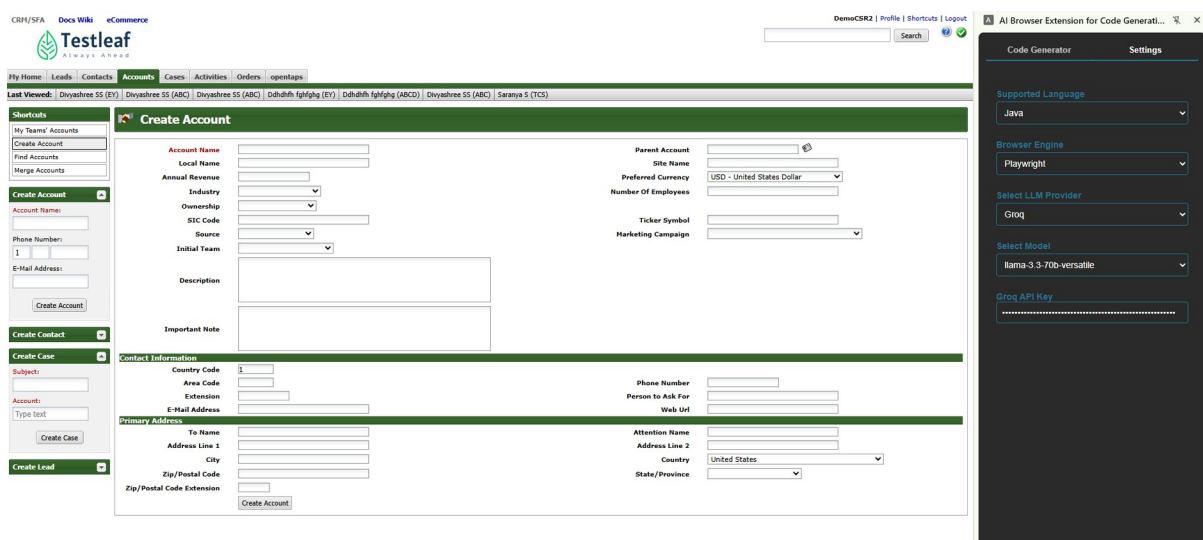

[MANDATORY]: Analyse the impacted files of existing Selenium with Java code properly

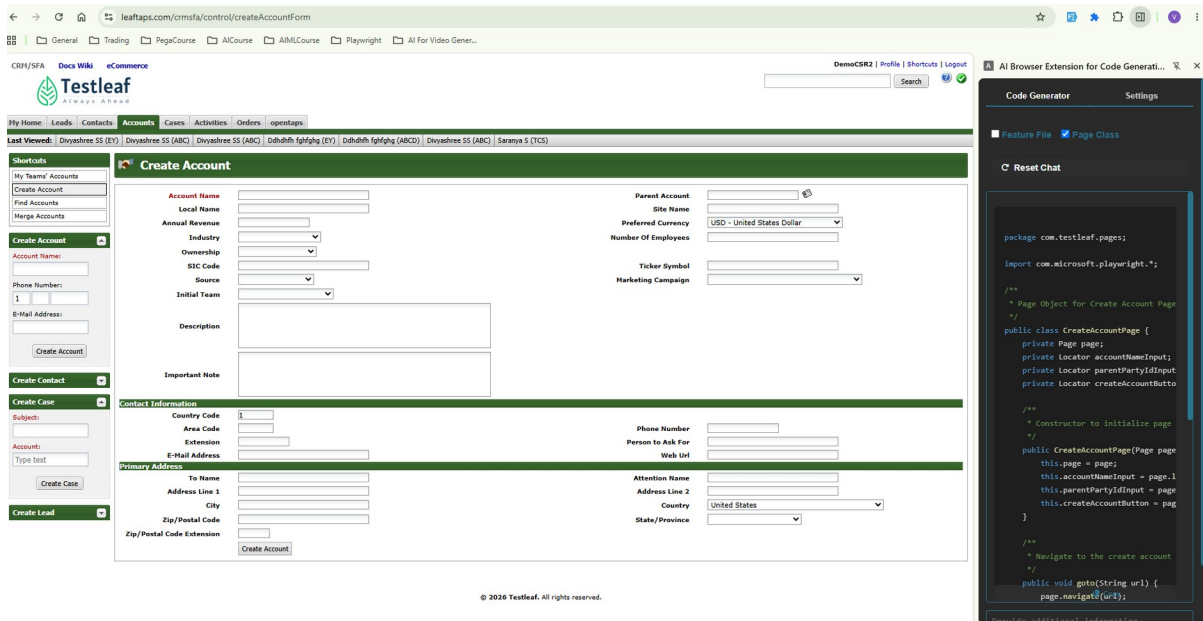

[MANDATORY]: Also analyse the impacted files for modifying the code for playwright with Java

Persona : Act as a test automation lead and review the impacted files shared. Finally share me the impacted files for Selenium with Java code and files that will be impacted for appending playwright with Java architecture

Prompt Given for Agent

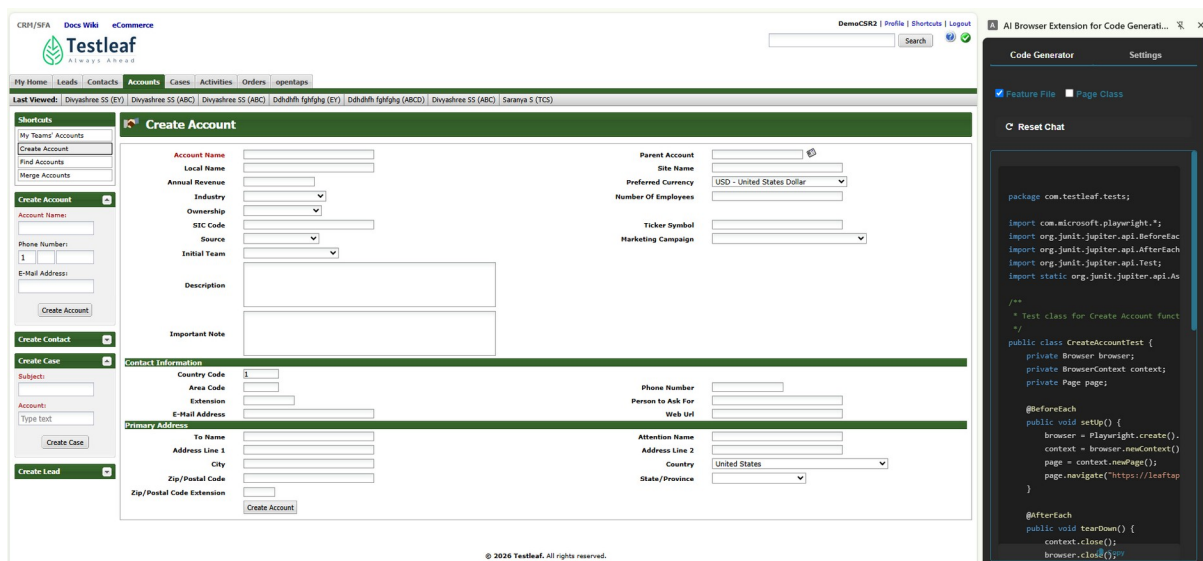

Act as a test automation architect and implement these changes step and step carefully without affecting the existing functionality or code. STRICTLY Lets go Step by Step And show me the changes that will be implemented in the files and proceed further only upon my approval

There was an issue. If I select only feature file checkbox, then also code was getting generated. Again with Vibe coding, I was able to fix the issue

Issue

Issue Fixed

Feature: Create Account

Scenario Outline: Successful account creation

Given I open the create account page

When I type "accountNames" into the text box

And I type "groupNamesLocal" into the text box

And I click the Create Account button

Then I should see the account created

Examples:

accountName | groupNamesLocal

Rajesh Kamath | Kamath Group

Suresh Menon | Menon Enterprise

Ramesh Rao | Rao Corporation

Scenario Outline: Account creation with error

Given I open the create account page

When I type "accountNames" into the text box

And I type "groupNamesLocal" into the text box

And I click the Create Account button

Then I should see an error message

Examples:

accountName | groupNamesLocal

|

Rajesh Kamath |
